

# Gwinnett, Newton, & Rockdale County Health Departments

## COVID-19 Snapshot, data as of 9am November 2, 2020

This is an emerging and dynamic situation, therefore our data and recommendations are subject to change. This report provides a snapshot of COVID-19 illnesses and specimen collection operations in response to the COVID-19 pandemic. The purpose of this report is to provide situational awareness to our district partners and community members.

### COVID-19 Incidence Rate per 100,000 by zip-code, as of November 2, 2020

| COVID-19 Cases & Deaths*                  |                 |                   |               |               |
|---|-----------------|-------------------|---------------|---------------|
|   | Confirmed cases | Presumptive Cases | Total Cases†  | Total Deaths† |

Due to the increasing availability of antigen testing, effective 9/1/2020, we will begin reporting antigen positives in addition to PCR positive patients. Patients testing positive with an antigen test are considered presumptive cases and warrant Public Health investigation and control measures, but are not included in confirmed case counts. The remainder of data reported in this report will include total cases which encompasses confirmed and presumptive.

# Gwinnett, Newton, & Rockdale County Health Departments

## COVID-19 Snapshot, data as of 9am November 2, 2020

Gwinnett, Newton, and Rockdale County Health Department’s Epidemiology Program is responsible for investigating every case of COVID-19 with laboratory evidence of recent infection. The data displayed here represents the Epidemiology Program’s activities and provides a portrayal of the current situation in the district.

Per Gwinnett, Newton, and Rockdale County Health Departments reporting policy only COVID-19 cases with laboratory evidence of recent infection that reside within the three counties that make up the district are displayed here. According to the Centers for Disease Control and Prevention the case definition of COVID-19 case with laboratory evidence of recent infection does not include serology (i.e. antibody tests). These tests are reportable, but because they are not included in the case definition for a COVID-19 case with laboratory evidence of recent infection, are not displayed here.

Reported COVID-19 Cases in residents of Gwinnett, Newton, and Rockdale Counties, as of 11/2/2020<sup>†</sup>

Reported Hospitalizations of COVID-19 cases in residents of Gwinnett, Newton, and Rockdale Counties, by Date of Occurrence<sup>†</sup>

Reported Deaths Among COVID-19 Cases in residents of Gwinnett, Newton, and Rockdale Counties, by Date of Occurrence<sup>†</sup>

\*14-day window of uncertainty – Confirmed cases over the last 14 days may not be accounted for due to illnesses yet to be reported or test result that may still be pending.  
\*\*For individuals missing symptom onset date, date of first positive specimen collection was used, if both symptom onset and date of first specimen collection are both missing date reported to Public Health Was used  
† Represents total confirmed and presumptive cases

Positivity Data from GNR Specimen Collection Sites, as Compared with all Reported Lab Specimens from Gwinnett, Newton, Rockdale Counties and GA (Cumulative - 3/1/2020 – 11/2/2020).

Two specimen Collection Sites (SPOCs) operate daily in Gwinnett and one alternating weeks in Newton and Rockdale Counties. SPOCs continue to offer specimen collection services at no cost to patients. Specimen collection at SPOC sties is done by appointment only. Appointments can be made on our website at [www.gnrhealth.com](http://www.gnrhealth.com) or by calling 770-513-5631. A total of 4,000-5,000 specimens are collected each week.

|                | GNR SPOCs      | Gwinnett        | Newton         | Rockdale       | Georgia           |
|----------------|----------------|-----------------|----------------|----------------|-------------------|
| Positive Tests | 8,633 (9.7%)   | 28,104 (9.7%)   | 2,665 (9.0%)   | 2,123 (8.2%)   | 339,565 (9.4%)    |
| Negative Tests | 7,9907 (90.1%) | 260,346 (90.3%) | 26,894 (91.0%) | 23,778 (91.8%) | 3,257,135 (89.6%) |
| Total Tests    | 88,841*        | 288,450         | 29,559         | 25,901         | 3,596,700         |

7-day Positivity Data by County for Gwinnett, Newton, and Rockdale Counties, Week 10/24/2020-10/30/2020

7-day positivity data represents the percentage of positive PCR test results in the district, by county, for the previous 7-day period. All COVID-19 cases are required to be reported to Public Health, but because of a significant reporting delay from facilities to Public Health, these numbers are provisional and subject to change. Also, due to the wide availability of testing in the community, numbers can include individuals who have been tested more than once.

| Seven Day Positivity Data |                |             |             |
|---------------------------|----------------|-------------|-------------|
|                           | Gwinnett       | Newton      | Rockdale    |
| Positive Tests            | 773 (6.7%)     | 63 (7.4%)   | 87 (11.5%)  |
| Negative Tests            | 10,731 (93.3%) | 787 (92.6%) | 667 (88.5%) |
| Total Tests               | 11,504         | 850         | 754         |

Data Source, SENDSS, Testing by District/County Quick Report. Data numbers may not align with current totals due to delay in report functionality . Report run 11/2/20 5pm.

14-day Case Rates for Gwinnett, Newton, and Rockdale Counties by Zip Code.

COVID-19 case rate data is calculated using the total number of cases identified during a specified time frame, divided by the population living within that zip code, multiplied by 100,000. Zip Codes with smaller population sizes may see significant variability from week to week. All COVID-19 cases are required to be reported to local public health; however, there can often be a significant reporting delay from facilities to public health. Therefore, these numbers are provisional and subject to change. In accordance with DPH, the date a lab is reported is the date used to calculate two-week case rates. This date will differ, sometimes significantly, from the date an individual becomes ill with symptoms of COVID-19 or the date an individual tested positive for COVID-19.

| Two week Case Rates per 100,000 by Zip Code N=2,069; Week 10/17/20 – 10/30/20† |       |            |           |          |   |       |            |           |          |       |
|--|-------|------------|-----------|----------|---|-------|------------|-----------|----------|-------|
