Check if sewage is: Backing up in house/business Surfacing in yard

A permit is hereby granted to install an on-site sewage management system and expires twelve (12) months from date of issue. Issuance of a construction permit for an on-site sewage management system and subsequent approval by Newton County Environmental Health Department (NCEHD) shall not be construed as a guarantee that such system will function satisfactorily for a given period of time. NCEHD does not assume any liability for damages which are caused by the malfunction of such system. NCEHD shall not be held liable for any damages that may occur to the underground utilities or sprinklers from our staff angering soil borings on the property. Please call 811 to have your underground utilities located prior to our on-septic repair permit evaluation.

PROPERTY OWNER'S/AUTHORIZED AGENT'S SIGNATURE _____

OFFICIAL USE ONLY

No record on file Drawing of existing system attached

Complaint on file: No Yes Complaint Number _____ Fee Paid _____

OSSMS Product/Configuration Selection Notification

Due to the variety of on-site sewage management systems (OSSMS) available in Georgia, notification of product and configuration to be installed must be determined and declared by the owner or agent before a site is permitted. After a permit has been issued, the property owner or agent must notify Environmental Health of any changes to the permit. These changes must be reviewed and approved before the OSSMS is installed. OSSMS criteria indicated on the permit must be adhered to. Any deviation from approved OSSMS criteria during construction of the OSSMS may void the permit, requiring the owner to apply for a new permit with new permit fees.

Please check with your septic system installer prior to choosing one of the following:

Product and Configuration	✓	Product and Configuration	✓
